The Nonpareil is the latest, cheapest, and best Lantern made. Each Lantern is sent out with Candle holder which fits into screw of reservoir. Can be had with Colza Burner in place of Petroleum (same price). Is specially adapted for Stables, Warehouses, Farmyards, Workshops, &c. There is no solder at top, so that whatever the heat it cannot fall to pieces, which is often the case with so-called hurricane lanterns. Oil tank is removed by pressing two springs which cannot get out of order. Glass is easily removed by catch at top, is made to take the ordinary hurricane lantern globe. It is in fact a far superior and cheaper lantern than has yet been put on the market.

For Petroleum and Candle, or Colza and Candle.
